

Please reject the National Association of Broadcaster's petition 04-160, which would end a fantastic service provided to satellite radio subscribers by companies like XM. My husband and I frequently travel throughout the country, and we rely on our XM for uninterrupted entertainment and information alike. There are many instances when we cannot tune in a local radio station, even when we are near major cities. It is at these times that XM is invaluable. We are often able to get weather forecasts and traffic updates as we are travelling into major metropolitan areas long before we can reach a local radio station, but in time to change our plans as necessary. And, should there ever be a need to provide travelers with information about a local area in the case of a terrorist attack, we know XM would be there. Please block the NABs petition, and let XM and the other satellite radio providers continue to broadcast their invaluable services! Frank and Gina Dreistadt
